THE T50 FROM ESCHMANN

In terms of quality and reliability Eschmann operating tables are acknowledged as being second to none, the very best in medical engineering technology for over 100 years – our assurance for your complete confidence.

The T50 operating table from Eschmann has been developed specifically for Obstetrics and Gynaecology, and offers a level of performance and functionality that sets a new standard of excellence for healthcare professionals around the world. With several patents pending, features include:

- Shorter table top (1083mm) reduces manual handling
- Powered backrest allows for 'Assisted Delivery' in a single movement
- Maximum patient weight of 300Kg in lithotomy position
- Weight assisted articulating leg sections
- Auto level function with increased speed for emergency procedures
- New accessories include instrument tray and side supports
- Choice of 50mm and 80mm Mattresses

1. Direct Placement Leg Holders - 81-272-10
2. Articulating leg section with boots & pads - 81-620-03
3. Lightweight leg section plus - TA-030-1077
4. T series instrument tray - 81-345-06
5. Short trunk side support - 81-368-57
   Backrest side support - 81-368-66

Base cut out
The cut out in the table base allows improved surgical access and positioning of a 'kick bowl'.
1. Positioned over backrest hinge ready for regional anaesthesia block
   Table at minimum height to allow patient to sit centrally onto the backrest hinge.

2. Supine position with articulating leg sections (81–620–03) in preparation for lithotomy positioning

3. Supine position using lightweight leg section plus (TA–030–1077) and direct placement leg holders (81–272–10) as an alternative in preparation for lithotomy positioning

4. Lithotomy position with direct placement leg holders (81–272–10)
   Patient’s perineum positioned over the perineal cutout to facilitate easy transition to lithotomy position without any patient movement relative to table top.
5. Lithotomy position using articulating legs and instrument tray (81-345-06)
   Instrument tray positioned into x-ray cassette tunnel.

6. Assisted delivery position using articulating legs, with backrest raised
   For patients bearing down as aid for assisted instrumental deliveries (e.g. 'ventouse' or forceps).

7. Lithotomy position with articulating leg sections
   Table top is placed into Trendelenburg, giving clear visualisation for postpartum tear.

8. Supine position with side supports
   Left tilt applied to table top, with side supports for emergency Caesarean section to avoid pressure on the vena cava.
General Specification

- Powered operating table, suitable for use in obstetrics and gynaecology
- Maximum patient weight of 300Kg in supine and lithotomy position
- Large wheels for easy table positioning and complete 360° mobility
- Covers are made of scratch and impact resistant ABS
- Base cover cut-out allows improved surgical access for theatre staff
- One button control system for removal of head and infill sections
- Single movement for ‘Assisted Delivery’ position
- Full length radiolucent top with integral X-ray cassette tunnel
- Seamless, “Velcro-free” mattresses with unique anti-static fixing
- 80mm and 50mm mattress options
- Robust and intuitive corded handset
- Battery status indicators on handset and table base
- Weight assisted articulating leg sections
- Unique design, patents pending
